Subject: Letter of Support

To the Campus250 Selection Committee,

It is with great enthusiasm that I write this letter to formally support Bao Tran's application for the Campus250 student mini-grant. As a faculty member at La Salle University, I have had the pleasure of observing Bao's academic growth and his exceptional dedication to undergraduate research, particularly in the realm of Artificial Intelligence and its societal applications.

Bao is a remarkably well-qualified student who possesses a rare blend of technical skills and creative vision. His proposal, "Project250," represents a meaningful approach to the Semiquincentennial by leveraging agentic AI to bridge the gap between Philadelphia's historical archives and modern digital accessibility.

I have committed to serving as the Project Advisor for this initiative. My role will involve: As his faculty project advisor, providing ongoing mentorship throughout the development phases to ensure the AI models adhere to high standards of historical accuracy and ethical data practices; I coordinate Bao's guest talks to my courses, which will provide him with a platform to share his findings and methodology with his peers; I will facilitate the project's participation in La Salle's STEM Day in October 2026. This event will serve as a primary showcase for the "Interactive Museum," allowing the broader community to engage with the digital legacy Bao is building.

Project250 is not just a technical exercise; it is a vital tool for inclusive storytelling. By focusing on diverse voices and neighborhood-level history, Bao's project is ensuring that the 250th anniversary belongs to all Philadelphians.

I have full confidence in Bao's ability to execute this project on time and within budget. I strongly urge the committee to support his visionary work.

Sincerely,

A handwritten signature in cursive script that reads 'Yang Wang'.

Yang Wang, Ph.D.
Associate Professor and Program Director
